Fisher explores the process of migration chronologically and at levels varying from the migration of an individual community, to larger patterns of the collective movements of major ethnic groups, to the more abstract study of emigration, migration, and immigration. The authors of VOYAGES IN WORLD HISTORY never forget that history is made up of the stories of people. Each chapter of the text centers on a story -- a traveler’s account that highlights the book’s main theme, the constant movement of people, goods, and ideas. The travelers include merchants, poets, rulers, explorers, soldiers, missionaries, and scholars, and their voyages provide a framework for each chapter that will capture students’ interest and draw them into the stories of the people, places, and events crucial to understanding world history. Special features highlight connections across chapters, societies, and periods, helping students understand historical events in a global context. How empires have used diversity to shape the world order for more than two millennia Empires—vast states of territories and peoples united by force and ambition—have dominated the political landscape for more than two millennia. Empires in World History departs from conventional European and nation-centered perspectives to take a remarkable look at how empires relied on diversity to shape the global order. Beginning with ancient Rome and China and continuing across Asia, Europe, the Americas, and Africa, Jane Burbank and Frederick Cooper examine empires' conquests, rivalries, and strategies of domination—with an emphasis on how empires accommodated, created, and manipulated differences among populations. Burbank and Cooper examine Rome and China from the third century BCE, empires that sustained state power for centuries. They delve into the militant monotheism of Byzantium, the Islamic Caliphates, and the short-lived Carolingians, as well as the pragmatically tolerant rule of the Mongols and Ottomans, who combined religious protection with the politics of loyalty. Burbank and Cooper discuss the influence of empire on capitalism and popular
sovereignty, the limitations and instability of Europe's colonial projects, Russia's repertoire of exploitation and differentiation, as well as the "empire of liberty"—devised by American revolutionaries and later extended across a continent and beyond. With its investigation into the relationship between diversity and imperial states, Empires in World History offers a fresh approach to understanding the impact of empires on the past and present. An Introductory Exploration of the History of the World The World's History encourages readers to explore the history of the world and the significance of this unique study. The past is not simply a list of events, rather the records of historic interpretations of those events. Because interpretations differ from historian to historian, the study of history becomes a pool of various narrations told from different perspectives. The World's History celebrates these differentiating values offering readers a rich, comprehensive, and challenging introduction the the study of world history and the methods and key interpretations of its historians. The World's History: Volume 1 covers Parts One through Five(chapters 1-13). The parts move progressively along a timeline from emergence of early humans to the present day encouraging students to analyze historical events and develop a grasp of the chronology of human development. Readers will gain an appreciation of the national and cultural origins of all their diverse fellow citizens. MyHistoryLab is an integral part of the Spodek program. In this third edition of Globalization in World History, Peter Stearns explores the roots of contemporary globalization, examining shifts in the global flow of people, goods, and ideas as early as 1000 CE. Exploring how four moments in history have accelerated the process of globalization, Stearns’s narrative details how factors such as economics, migration, disease transmission, culture, the environment, and politics have influenced the nature of globalization as we understand it today. This revised edition includes: Updates to the whole study with appropriate recent references; New brief transition sections that focus attention on the Mongol period, debates over the role of the eighteenth century, and the partial retreat from globalization after World War I; A new final chapter that deals with the rise in attacks on globalization during the most recent decade, from populist objections to the implications of growing authoritarianism, raising the question of whether a new transition is taking shape around us today. Through an interdisciplinary approach that links political, sociological, and historical perspectives, Stearns provides a comprehensive overview of globalization and the historical factors that have shaped it. This book will be of interest to undergraduate and postgraduate students of world history, economic history, and political economy. This text is a genuinely and originally concise (rather than one of the boiled-down "brief" editions of bigger texts offered by most publishers) and affordable B&W alternative to the $100+ gorillas that dominate this market.

With its boiled-down narrative, the book will be an attractive option for instructors who like to develop their own distinctive course with a range of other readings. Review chapter * End-of-chapter drills to test your understanding of primary sources and how they relate to key ideas in world history. World history has expanded dramatically in recent years, primarily as a teaching field, and increasingly as a research field. Growing numbers of teachers and Ph.Ds in history are required to teach the subject. They must be current on topics from human evolution to industrial development in Song-dynasty China to today's disease patterns - and then link these disparate topics into a coherent course.

Numerous textbooks in print and in preparation summarize the field of world history at an introductory level. But good teaching also requires advanced training for teachers, and access to a stream of new research from scholars trained as world historians. In this book, Patrick Manning provides the first comprehensive overview of the academic field of world history. He reviews patterns of research and debate, and proposes guidelines for study by teachers and by researchers in world history.

that has developed in human history (and helped, in turn, develop human history), like the innovation of the Chinese writing system or religious syncretism in India. Each case study clearly shows how an innovation originated either in one geographical center or independently in several different centers. It demonstrates how, as people in the centers interacted with their neighbors, the neighbors adapted to--and in many cases were transformed by--the idea, object, or event. Adaptations include the entire spectrum of human responses, ranging from outright rejection to creative borrowing and, at times, forced acceptance. * Concept Maps at the end of each chapter use compelling graphical representations of ideas and information to help students remember and relate the big patterns of the chapter. Ross Dunn's classic retelling of the travels of Ibn Battuta, a Muslim of the 14th century. The definitive history of the Cold War and its impact around the world We tend to think of the Cold War as a bounded conflict: a clash of two superpowers, the United States and the Soviet Union, born out of the ashes of World War II and coming to a dramatic end with the collapse of the Soviet Union. But in this major new work, Bancroft Prize-winning scholar Odd Arne Westad argues that the Cold War must be understood as a global ideological confrontation, with early roots in the Industrial Revolution and ongoing repercussions around the world. In The Cold War, Westad offers a new perspective on a century when great power rivalry and ideological battle transformed every corner of our globe. From Soweto to Hollywood, Hanoi, and Hamburg, young men and women felt they were fighting for the future of the world. The Cold War may have begun on the perimeters of Europe, but it had its deepest reverberations in Asia, Africa, and the Middle East, where nearly every community had to choose sides. And these choices continue to define economies and regimes across the world. Today, many regions are plagued with environmental threats, social divides, and ethnic conflicts that stem from this era. Its ideologies influence China, Russia, and the United States; Iraq and Afghanistan have been destroyed by the faith in purely military solutions that emerged from the Cold War. Stunning in its breadth and revelatory in its perspective, this book expands our understanding of the Cold War both geographically and chronologically, and offers an engaging new history of how today's world was created. This world history of genocide examines the longue durée of mass murder from the beginning of human history to the present. Cases of genocide are examined as distinct episodes of killing, but in connection with earlier episodes. Communist and anti-communist genocides are considered, as are cases of settler (or colonial) genocide. The second edition of this concise survey offers a comparative and comprehensive study of culinary cultures and food politics throughout the world, from ancient times to the present day. It examines the long history of globalization of foods as well as the political, social, and environmental implications of our changing relationship with food, showing how hunger and taste have been driving forces in human history. Including numerous case studies from diverse societies and periods, Food in World History explores such questions as: What social factors have historically influenced culinary globalization? How did early modern plantations establish patterns for modern industrial food production? Were eighteenth-century food riots comparable to contemporary social movements around food? Did Italian and Chinese migrant cooks sacrifice authenticity to gain social acceptance in the Americas? Have genetically modified foods fulfilled the promises made by proponents? This new edition includes expanded discussions of gender and the family, indigeneity, and the politics of food. Expanded chapters on contemporary food systems and culinary pluralism examine debates over the concentration of corporate control over seeds and marketing, authenticity and exoticism within the culinary tourism industry, and the impact of social media on restaurants and home cooks. Technology: A World History offers a brilliant history of invention around the globe. Historian Daniel R. Headrick ranges from the Stone Age and the beginnings of agriculture to the Industrial Revolution and the electronic revolution of the recent past. In tracing the growing power of humans over nature through
increasingly powerful innovations, he compares the evolution of technology in different parts of the world, providing a much broader account than is found in other histories of technology. The book goes on to describe the rise of the first modern-style human rights statements, associated with the Enlightenment and contemporary antislavery and revolutionary fervour. The authors of VOYAGES IN WORLD HISTORY never forget that history is made up of the stories of people. Each chapter of the text centers on a story -- a traveler's account that highlights the book's main theme, the constant movement of people, goods, and ideas. The travelers include merchants, poets, rulers, explorers, soldiers, missionaries, and scholars, and their voyages provide a framework for each chapter that will capture students' interest and draw them into the stories of the people, places, and events crucial to understanding world history. Knowledge and Power presents and explores science not as something specifically for scientists, but as an integral part of human civilization, and traces the development of science through different historical settings from the Middle Ages through to the Cold War. Five case studies are examined within this book: the creation of modern science by Muslims, Christians and Jews in the medieval Mediterranean; the global science of the Jesuit order in the early modern world; the relationship between "modernization" and "westernization" in Russia and Japan from the late seventeenth to the mid-nineteenth century; the role of science in the European colonization of Africa; and the rivalry in "big science" between the United States and the Soviet Union during the Cold War. Each chapter includes original documents to further the reader's understanding, and this second edition has been enhanced with a selection of new images and a new chapter on Big Science and the Superpowers during the Cold War. Since the Middle Ages, people have been working in many civilizations and cultures to advance knowledge of, and power over, the natural
world. Through a combination of narrative and primary sources, Knowledge and Power provides students with an understanding of how different cultures throughout time and across the globe approached science. It is ideal for students of world history and the history of science. The fifth edition of this bestselling book is for school and college students taking courses in Modern World History and for undergraduates in History and International Relations. It is a complete, self-contained, lively and highly readable course, suitable for individual study or classroom use. The general reader who wishes to find out how the world got into its present state will also find the book useful. Key features of the fifth edition: • A new chapter on Latin America and its changing relationship with the USA • New sections on the Arab Spring, the 2008 financial crash and its aftermath, and the European Union in crisis • New material on the changing face of communism in China; USA: Bush to Obama; Russia under Putin and Medvedev; the continuing conflict between Palestinians and Israelis and the 'war against terrorism' Content includes: • A survey of international relations and war from 1900 to 2012 • Europe and its history - the rise and fall of fascism and communism • International affairs of the major superpowers - USA, Russia/USSR and China • International conflict - The Holocaust, 9/11 and the fall of Saddam Hussein • Decolonization and subsequent events in Africa, and the rise of political Islam • Global problems - climate change, economic crises, the population 'explosion' • Mention of disagreements and controversies among historians, as well as new interpretations and discoveries Norman Lowe has had many years' experience of teaching History at all levels, and for 25 years was Head of History at Nelson and Colne College in Lancashire.
