David Childress, popular author and star of the History Channel show Ancient Aliens, brings us the incredible tale of the German flying disk known as the Haunebu. Although rumors of German flying disks have been around since the late years of WWII it was not until 1989 when a German researcher named Ralf Ettl living in London received an anonymous packet of photographs and documents concerning the planning and development of at least three types of unusual craft--craft which we would classify today as UFOs or flying saucers. Ettl went on to make several television documentaries based on the material in the packet and released most of the documents and photos to researchers in Austria and other parts of Europe. What the Ralf Ettl document dump shows us is what many have suspected for a long time: that WWII did not end in the manner in which we have been told, and a remnant of the Nazi military--particularly the SS--continued to operate flying saucers and submarines around the world in the decades after the end of the war. This activity--involving a flying saucer known as the Haunebu--was particularly notable in South America, but it ultimately involved all the continents of the world including Antarctica. Join Childress as he shows us the secret files involving the Haunebu, the Vril craft, the Andromeda craft, and others. Includes a 16-page color section. Venice's Secret Service is the untold and arresting story of the world's earliest centrally-organised state intelligence service. Long before the inception of SIS and the CIA, in the period of the Renaissance, the Republic of Venice had masterminded a remarkable centrally-organised state intelligence organisation that played a pivotal role in the defence of the Venetian empire. Housed in the
imposing Doge's Palace and under the direction of the Council of Ten, the notorious governmental committee that acted as Venice's spy chiefs, this 'proto-modern' organisation served prominent intelligence functions including operations (intelligence and covert action), analysis, cryptography and steganography, cryptanalysis, and even the development of lethal substances. Official informants and amateur spies were shipped across Europe, Anatolia, and Northern Africa, conducting Venice's stealthy intelligence operations. Revealing a plethora of secrets, their keepers, and their seekers, Venice's Secret Service explores the social and managerial processes that enabled their existence and that furnished the foundation for an extraordinary intelligence organisation created by one of the early modern world's most cosmopolitan states. Can language and literature cure psychological trauma? If so, what forms do they (have to) take in doing so? When does language hit the wall where the unspeakable mandates silence? And where might literature come in as the rescuing hand by offering forms of expression which are rooted in speech but transcend the merely spoken? This study confronts these issues through the double lenses of Sebastian Barry's œuvre and the complex of dissociative disorders that are at work both in his creative output and the ways in which he fictionalizes dark and traumatic biographical data. David Childress, popular author and star of the History Channel show Ancient Aliens, brings us the amazing story of the German Andromeda craft, designed and built during WWII. Along with flying disks, the Germans were making long, cylindrical airships that are commonly called motherships—large craft that house several smaller disk craft. It was not until 1989 that a German researcher named Ralf Ettl, living in London, received an anonymous packet of photographs and documents concerning the planning and development of at least three types of unusual craft—including the Andromeda. Ettl went on to make several television documentaries based on the material in the packet and released most of the documents and photos to researchers in Austria and other parts of Europe. Bill Tompkins was embedded in the world of secrecy as a teenager, when the Navy took his personal ship models out of a Hollywood department store because they showed the classified locations of the radars and gun emplacements. He was personally present at the "Battle of L.A." when a thousand rounds of ammo were fired at UFOs, and one of the Nordic craft may have selected him to be their rep in the evolving aerospace race. This book is a partial autobiography about his life to the beginning of the 1970s including
some of his early work for TRW. Selected by the Navy prior to completing high school to be authorized for research work, he regularly visited classified Naval facilities during WWII until he was discharged in 1946. After working at North American Aviation and Northrop, he was hired by Douglas Aircraft Company in 1950, and when they found out about his involvement in classified work, was given a job as a to create design solutions as a draftsman with a peripheral assignment to work in a “think tank.” This work was partly controlled by the Navy personnel who used to work for James Forrestal, who was allegedly assassinated because he was going to publicly reveal what he knew about UFOs. Bill Tompkins was asked to conceive sketches of mile-long Naval interplanetary craft designs. Later, as he became involved in the conventional aspects of the Saturn Program that later became the Apollo launch vehicle, his insight to system engineering resulted in his offering some critical suggestions personally to Dr. Wernher von Braun about ensuring more reliable checkout using the missiles in their vertical position and also some very efficient launch control concepts adopted by both NASA and the Air Force. This story is peppered with very personal interactions with his co-workers and secretaries, some of whom the author believes to be Nordic aliens helping the “good guys” here on Earth. Towards the end of this volume of his autobiography, he sketches what he personally saw on TV when Armstrong was landing on the moon. Born in May 1923, Bill Tompkins is one of the few survivors of the “big war” who is still healthy, married to the same girl Mary, and is willing to tell his story about what he really did during his aerospace life in the 40s, 50s and 60s that relate to aliens, NASA and secrets that now can be told. Ever wonder how to get started making your own money? "Secrets of the Craft Show Business," will help you organize your thoughts. While giving you insight on product design, pricing and basic sales techniques. Throughout this book there are many clues to finding a good promoter! In the chapter "Always Do a Recon" the inside scoop to finding profitable shows will be revealed. The how, where and what to look for in a good show is spelled out, spoon fed! Visual hooks will be your best friend in "Booth Design and Layout." A creative design will peak a happy shoppers curiosity, while loosening the cash. "Secrets of the Craft Show Business" will help novices and professionals not to act like a "Hungry Vendor." Throughout the journey of life and while reading this book "It's about enjoyment!" How are you going to be a business-person, make some money while enjoying yourself? The answer is at your finger tips. The greatest secret to being successful is finding a business you enjoy spending time in. With twenty-seven years in the craft show business there have been many mistakes made. The reason this book was written is to help honest hard working people to gain freedom, independence and cash. We all like cash, don't we? "Come, sit by me," says Grandmother. "Take this chalk in your hand. Now draw a dot and concentrate all your energy into this one dot. It is the beginning and the end, the navel of the world." So Fawzia Al-Rawi describes her grandmother's first lesson about the ancient craft of Oriental dance. Grandmother's Secrets always circles back to this grandmother and this young girl, echoing the circular movements of the dance itself. Al-Rawi has written a strikingly graceful and original book that blends personal memoir with the history and theory of the dance known in the West as "belly dancing." It is the story of a young Arab girl as she is initiated into womanhood. It is a history of the dance from the earliest times through the days of the Pharaohs, the Roman Empire, to the Arab world of the last three centuries. It is a personal investigation into the effects of the dance's movements on individual parts of the body and the whole psyche. It is a guide to the actual techniques of the dance for those who are inspired to put down the book and move. Al-Rawi conveys in this book not only the history and technique of grieving and mourning dances, pregnancy and birth dances, but the spirit of these age-old
rituals, and their possibilities for healing and empowering women today. Secret Practice takes
the reader to the next level, empowering Templar practice never published before. The reader
will discover the ritual works for dedication to the path and learn how to achieve personal
outcomes. In the small Californian town of Palomo Grove several children are born, the
offspring of the Jaff, a man-spirit obsessed with darkness and depravity, and of Fletcher, a
force for light, who has fought the Jaff across America. LEARN HOW TO SELL ON ETSY

The US Air Force is experiencing a profound shift! In order to aggregate the military's major space assets under one authority, they are being moved into a new branch under the purview of the Air Force. This new branch is to be called "Space Force." The true purpose of Space Force will be to publicly unveil the most well-guarded secrets in the Air Force's stunning arsenal of exotic spacecraft, unconventional weapons and mind-blowing technologies assembled over the more than seventy years since its official emergence in 1947. This book lays out the history of the Air Force Secret Space Program: Ushering in a new era with the recovery of several extraterrestrial craft in the 1940's. Secret agreements with a breakaway German colony in Antarctica (the Fourth Reich) & different extraterrestrial groups in the 1950's. Its complicity in the German infiltration of NASA & the Military-Industrial Complex in the 1960's. Development of stealth space stations beginning from the 1970's. Deployment of squadrons of disk, triangle and rectangular-shaped craft in the 1980's & 1990's. After its 2016 discovery that it had been deceived by the Deep State and their shadowy Fourth Reich allies, Air Force leaders made the momentous decision to shift alliances and realigned their covert space program with human-looking extraterrestrials. This has led to bold steps being taken by the Air Force to reveal the existence of its arsenal of spacecraft to the US public. A primer on the underlying technologies that allow computer programs to work. Covers topics like computer hardware, combinatorial logic, sequential logic, computer architecture, computer anatomy, and Input/Output. Many coders are unfamiliar with the underlying technologies that make their programs run. But why should you care when your code appears to work? Because you want it to run well and not be riddled with hard-to-find bugs. You don't want to be in the news because your code had a security problem. Lots of technical detail is available online but it's not
organized or collected into a convenient place. In The Secret Life of Programs, veteran engineer Jonathan E. Steinhart explores—in depth—the foundational concepts that underlie the machine. Subjects like computer hardware, how software behaves on hardware, as well as how people have solved problems using technology over time. You'll learn: How the real world is converted into a form that computers understand, like bits, logic, numbers, text, and colors. The fundamental building blocks that make up a computer including logic gates, adders, decoders, registers, and memory. Why designing programs to match computer hardware, especially memory, improves performance. How programs are converted into machine language that computers understand. How software building blocks are combined to create programs like web browsers. Clever tricks for making programs more efficient, like loop invariance, strength reduction, and recursive subdivision. The fundamentals of computer security and machine intelligence. Project design, documentation, scheduling, portability, maintenance, and other practical programming realities. Learn what really happens when your code runs on the machine and you'll learn to craft better, more efficient code.
