Language Perception and Production Nov 03 2021

Language History, Language Change, and Language Relationship Mar 15 2020 Why does language change? Why can we speak to and understand our parents but have trouble reading Shakespeare? Why is Chaucer's English of the fourteenth century so different from Modern English of the late twentieth century that the two are essentially different languages? Why are Americans and English 'one people divided by a common language'? And how can the language of Chaucer and Modern English - or Modern British and American English - still be called the same language? The present book provides answers to questions like these in a straightforward way, aimed at the non-specialist, with ample illustrations from both familiar and more exotic languages. Most chapters in this new edition have been reworked, with some difficult passages removed, other passages thoroughly rewritten, and several new sections added, e.g. on the regularity of sound change and its importance for general historical-comparative linguistics. Further, the chapter notes and bibliography have all been updated. The content is engaging, focusing on topics and issues that spark student interest. Its goals are broadly pedagogical and the level and presentation are appropriate for interested beginners with little or no background in linguistics. The language coverage for examples goes well beyond what is usual for books of this kind, with a considerable amount of data from various languages of India.

Language and Creativity Jan 13 2020 Language and Creativity has become established as a pivotal text for courses in English Language, Linguistics and Literacy. Creativity in language has conventionally been regarded as the preserve of institutionalised discourses such as literature and advertising, and individual gifted minds. In this ground-breaking book, bestselling author Ronald Carter explores the idea that creativity, far from being simply a property of exceptional people, is an exceptional property of all people. Drawing on a range of real examples of everyday conversations and speech, from flatmates in a student house and families on holiday to psychotherapy sessions and chat-lines, the book argues that creativity is an all-pervasive feature of everyday language. Using close analysis of naturally occurring language, taken from a unique 5 million word corpus, Language and Creativity reveals that speakers commonly make meanings in a variety of creative ways, in a wide range of social contexts and for a diverse set of reasons. This Routledge Linguistics Classic is here reissued with a new preface from the author, covering a range of key topics from e-language and internet discourse to English language teaching and world Englishes. Language and Creativity continues to build on the previous theories of creativity, offering a radical contribution to linguistic, literary and cultural theory. A must for anyone interested in the creativity of our everyday speech.

The Language of Love and Guilt Aug 12 2022 Although mother and daughter are two central female roles, they have rarely been investigated. The relationship is specific, certainly different than the mother-son or father-daughter relationships. And this difference manifests itself in sex-specific language behavior. Despite ‘eternal’ features of the mother-daughter relationship, its quality is affected by individual psychological and by sociocultural variables. Thus, investigations took place in two big cities with very different structures and traditions: Vienna and Los Angeles. This is the first cross-cultural study which reflects and combines multiple linguistic, socio-psycholinguistic and text
linguistic categories, approaches and methods to be able to investigate such an important topic as family relationships and the ‘place’ of women nowadays in our societies.

Language and Relationship in Wordsworth’s Writing Nov 10 2019 William Wordsworth (1770-1850) needs little introduction as the central figure in Romantic poetry and a crucial influence in the development of poetry generally. This broad-ranging survey redefines the variety of his writing by showing how it incorporates contemporary concepts of language difference and the ways in which popular and serious literature were compared and distinguished during this period. It discusses many of Wordsworth's later poems, comparing his work with that of his regional contemporaries as well as major writers such as Scott. The key theme of relationship, both between characters within poems and between poet and reader, is explored through Wordsworth’s construction of community and his use of power relationships. A serious discussion of the place of sexual feeling in his writing is also included.

Learning to Read Across Languages Jan 25 2021 This book systematically examines how learning to read occurs in diverse languages, and in so doing, explores how literacy is learned in a second language by learners who have achieved at least basic reading skills in their first language. As a
consequence of rapid globalization, such learners are a large and growing segment of the school population worldwide, and an increasing number of schools are challenged by learners from a wide variety of languages, and with distinct prior literacy experiences. To succeed academically these learners must develop second-language literacy skills, yet little is known about the ways in which they learn to read in their first languages, and even less about how the specific nature and level of their first-language literacy affects second-language reading development. This volume provides detailed descriptions of five typologically diverse languages and their writing systems, and offers comparisons of learning-to-read experiences in these languages. Specifically, it addresses the requisite competencies in learning to read in each of the languages, how language and writing system properties affect the way children learn to read, and the extent and ways in which literacy learning experience in one language can play a role in subsequent reading development in another. Both common and distinct aspects of literacy learning experiences across languages are identified, thus establishing a basis for determining which skills are available for transfer in second-language reading development. Learning to Read Across Languages is intended for researchers and advanced students in the areas of second-language learning, psycholinguistics, literacy, bilingualism, and cross-linguistic issues in language processing.

Webb has unveiled an innovative approach for creating a new language in romantic relationships. Her ideas have an impact on our lexical options as she explores ways in which ethically nonmonogamous people can create new language, manipulate existing metaphors, and communicate in a way that is both effective and elicits empathy in their partners.
